

Marine Engineering Knowledge (MEK)

176 Practice Questions and Answers for STCW Exams

Updated for DG Shipping India Exams | Source: brightmariner.com

Practice Set 1

Q1. Boiler is related to _____

- A) Steam Generation
- B) Human waste
- C) Storing Vegetables
- D) Steering

Correct Answer: A (Steam Generation)

Q2. Which of the following is bottom most part of a diesel engine?

- A) Connecting Rod
- B) Piston
- C) Turbo charger
- D) Exhaust valve

Correct Answer: A (Connecting Rod)

Q3. Main Engine is part of the _____ system

- A) Ballast
- B) Electrical
- C) Propulsion
- D) Bilge

Correct Answer: C (Propulsion)

Q4. Domestic Fridge is related to _____.

- A) Human waste
- B) Steering
- C) Starting of Main Engine
- D) Storing Vegetables

Correct Answer: D (Storing Vegetables)

Q5. Which of the following is top most part of a diesel engine?

- A) piston
- B) cylinder head
- C) crank shaft
- D) crankcase door

Correct Answer: B (cylinder head)

Q6. Which of the following is lower most part of a diesel engine?

- A) turbo charger
- B) exhaust valve
- C) bed plate
- D) piston

Correct Answer: C (bed plate)

Q7. Which of the following is within the engine room?

- A) paint storage room
- B) CO2 Room
- C) cargo pump room
- D) purifiers room

Correct Answer: D (purifiers room)

Q8. Which of the following is not within the engine room?

- A) fresh water generator
- B) fire pump
- C) fridge room
- D) refrigeration machinery

Correct Answer: C (fridge room)

Q9. Which of the following is not within the engine room?

- A) boiler
- B) mooring winch
- C) air compressor
- D) generator engine

Correct Answer: B (mooring winch)

Q10. Which of the following is not a job of an engine room rating?

- A) assist in watchkeeping
- B) assist in watchkeeping
- C) assist in maintenance work
- D) operate main engine

Correct Answer: D (operate main engine)

- A) start and stop engine
- B) overhaul air compressor
- C) assist in maintenance work
- D) report to bridge about engine condition

Correct Answer: C (assist in maintenance work)

Q12. Boiler is related to _____.

- A) Storing Vegetables
- B) Human waste
- C) Steam Generation
- D) Steering

Correct Answer: C (Steam Generation)

Q13. Sewage Treatment Plant is related to _____.

- A) Starting of Main Engine
- B) Steering
- C) Human waste
- D) Storing Vegetables

Correct Answer: C (Human waste)

Q14. What is not a system

- A) Boiler
- B) Purifier
- C) Air compressor
- D) Main Engine

Correct Answer: D (Main Engine)

Q15. A "BOLT" has

- A) Hexagonal head and threads at other end
- B) Thread at both ends
- C) Slotted head and threads at other end
- D) Double pitch threads

Correct Answer: A (Hexagonal head and threads at other end)

Q16. "Cuts" are caused by

- A) Flat spanners
- B) Blunt chisels
- C) Hammers
- D) Sharp objects

Correct Answer: D (Sharp objects)

- A) True
- B) False

Correct Answer: A (True)

Q18. For lifting a heavy load, you will use

- A) Eye bolt
- B) Air Cylinder
- C) Hydraulic Jack
- D) Chain Block

Correct Answer: D (Chain Block)

Q19. A TAP is used to make internal threads inside a drilled hole

- A) True
- B) False

Correct Answer: A (True)

Q20. A "STUD" has

- A) Threads at one end with a slot at the other end
- B) Double pitch threads
- C) Hexagonal head and thread at the other end
- D) Thread at both ends

Correct Answer: D (Thread at both ends)

Practice Set 2

Q1. Which of this is not fitted on the cylinder head of a diesel engine

- A) exhaust valve
- B) turbo charger
- C) starting valve
- D) indicator valve

Correct Answer: B (turbo charger)

Q2. Which of this is not a moving part of a diesel engine

- A) piston
- B) crankshaft
- C) crankcase
- D) connecting rod

Correct Answer: C (crankcase)

- A) hydraulic oil motors/pressure
- B) compressed air
- C) turbo generator
- D) air compressor

Correct Answer: B (compressed air)

Q4. Purpose of fresh water circulation through diesel engine cylinder is to

- A) prevent corrosion
- B) remove heat of combustion
- C) clean exhaust gases
- D) lubricate moving part

Correct Answer: B (remove heat of combustion)

Q5. Turning gear on main engine is provided for

- A) releasing parts if jammed
- B) turning the engine during overhaul
- C) remove exhaust gases from cylinder
- D) ensure turning of propeller

Correct Answer: B (turning the engine during overhaul)

Q6. Exhaust gas economiser produces

- A) fresh water
- B) steam
- C) inert gas
- D) electricity

Correct Answer: B (steam)

Q7. Turbo chargers on diesel engine

- A) acts as fuel charger
- B) decreases the pressure of intake air
- C) increases pressure of intake air
- D) increases RPM

Correct Answer: C (increases pressure of intake air)

Q8. Exhaust gases from the main engine go to the atmosphere through

- A) inert gas generator
- B) oil fired boiler
- C) exhaust fan
- D) exhaust gas boiler

Correct Answer: D (exhaust gas boiler)

- A) pressure
- B) exhaust temperature
- C) speed
- D) level of water

Correct Answer: A (pressure)

Q10. Function of a cylinder head relief valve is to

- A) prevent crankcase explosion
- B) stop the engine
- C) reduce the speed of engine
- D) release excessive pressure

Correct Answer: D (release excessive pressure)

Q11. Function of crankcase relief door is to

- A) release pressure from crankcase
- B) stop the engine
- C) reduce the speed of engine
- D) detect the mist inside the crankcase

Correct Answer: A (release pressure from crankcase)

Q12. If cooling water becomes less in a diesel engine the engine will

- A) make more noise
- B) cool down too much
- C) get overheated
- D) not start

Correct Answer: C (get overheated)

Q13. Diesel engine bearing will get damaged if supply of _____ is not enough

- A) air
- B) fuel
- C) water
- D) lubricating oil

Correct Answer: D (lubricating oil)

Q14. Speed of diesel engine is adjusted by changing the supply of

- A) air
- B) fuel
- C) water
- D) lubricating oil

Correct Answer: B (fuel)

- A) lubricating oil
- B) sartin air
- C) exhaust gas
- D) steam pressure

Correct Answer: A (lubricating oil)

Q16. One of the function of lubricating oil in a diesel engine is to reduce

- A) exhaust temperatures
- B) friction between moving parts
- C) wexhaust gases
- D) weight of the engine

Correct Answer: B (friction between moving parts)

Q17. Function of crankcase lubricating oil in a diesel engine is to _____

- A) improve combustion
- B) prevent corrosion
- C) supply power
- D) turn crankshaft

Correct Answer: B (prevent corrosion)

Q18. The lower most ring on a diesel engine piston is called

- A) split ring
- B) compression ring
- C) pressure ring
- D) oil scraper ring

Correct Answer: D (oil scraper ring)

Q19. For good combustion,the color of the exhaust from diesel engine should be

- A) light brown
- B) colourless
- C) light grey
- D) bluish white

Correct Answer: B (colourless)

Q20. Ships propeller is fitted to

- A) stern tube
- B) intermediate shaft
- C) tail shaft
- D) crankshaft

Correct Answer: C (tail shaft)

- A) 4 stroke
- B) 2 stroke
- C) 6 stroke
- D) medium stroke

Correct Answer: A (4 stroke)

Q22. When starting engine on diesel oil, before injection the oil is

- A) heated to same temp s heavy oil
- B) heated if necessary in cold climate
- C) passed through the purifier
- D) mixed with steam

Correct Answer: B (heated if necessary in cold climate)

Q23. A cam shaft on diesel engine operates

- A) fuel injection pump
- B) flywheel
- C) fuel valves
- D) starting valves

Correct Answer: A (fuel injection pump)

Q24. Thrust block for main engine is fitted at the

- A) forward side of engine
- B) aft side of engine
- C) end of the cam shaft
- D) tail shaft

Correct Answer: B (aft side of engine)

Q25. Function of a cylinder head relief valve is to

- A) Release excessive pressure
- B) Reduce the speed of the engine
- C) Stop the engine
- D) Prevent crankcase explosion

Correct Answer: A (Release excessive pressure)

Q26. The purpose of Injector valve on a generator engine is for _____

- A) Safety
- B) Fresh air intake
- C) Fuel inlet
- D) Compress air

Correct Answer: C (Fuel inlet)

- A) Stays in place
- B) Opens and closes
- C) Rotates in place
- D) Moves up and down

Correct Answer: B (Opens and closes)

Practice Set 3

Q1. Thrust block for main engine is fitted at the

- A) End of the cam shaft
- B) Tail Shaft
- C) Forward side of Engine
- D) Aft side of Engine

Correct Answer: D (Aft side of Engine)

Q2. Piston in a Diesel engine _____

- A) Stays in place
- B) Moves up and down
- C) Oscillates
- D) Rotates in place

Correct Answer: B (Moves up and down)

Q3. The purpose of Exhaust Gas in a Diesel engine is to ____

- A) Reduces friction
- B) Increases air supply
- C) Turns turbo charger
- D) Gives power

Correct Answer: C (Turns turbo charger)

Q4. What is to be checked on a running Main engine , during watch.

- A) Exhaust temperature
- B) Oil coming out of water side
- C) Steering angle
- D) Discharge pressure of liquid

Correct Answer: A (Exhaust temperature)

Q5. Air starting valve in a Diesel engine _____

- A) Oscillates
- B) Moves up and down
- C) Moves from side to side
- D) Opens only at engine starting

Correct Answer: D (Opens only at engine starting)

Q6. The purpose of Indicator valve on a generator engine is for _____

- A) Fresh air intake
- B) Compressed air
- C) Blowing through
- D) Fuel inlet

Correct Answer: C (Blowing through)

Q7. Which of these is NOT a moving part of a diesel engine:

- A) Crankcase
- B) Connecting rod
- C) Piston
- D) Crankshaft

Correct Answer: A (Crankcase)

Q8. Cylinder Head in a Diesel engine _____

- A) Oscillates
- B) Rotates in place
- C) Moves up and down
- D) Stays in place

Correct Answer: D (Stays in place)

Q9. The purpose of Inlet valve on a generator engine is for _____

- A) Safety
- B) Fresh air intake
- C) Compress air
- D) Fuel inlet

Correct Answer: B (Fresh air intake)

Q10. The purpose of Exhaust valve on a generator engine is for _____

- A) Combustion Gases
- B) Stop fuel
- C) Fuel inlet
- D) Fresh air intake

Correct Answer: A (Combustion Gases)

Q11. Before starting a generator engine, LO hand pump should be operated to

- A) Warm up the engine
- B) Supply lub oil to moving parts
- C) Check the level of the tank
- D) Turn the engine

Correct Answer: B (Supply lub oil to moving parts)

- A) Moves up and down
- B) Stays in place
- C) Oscillates
- D) Rotates in place

Correct Answer: C (Oscillates)

Q13. The purpose of Fuel Oil in a Diesel engine is to _____

- A) Reduces friction
- B) Gives power
- C) Turns turbo charger
- D) Causes explosion

Correct Answer: B (Gives power)

Q14. The purpose of Lubricating Oil in a Diesel engine is to _____

- A) Increases air supply
- B) Reduces friction
- C) Turns turbo charger
- D) Gives power

Correct Answer: B (Reduces friction)

Q15. Crankshaft in a Diesel engine _____

- A) Rotates in place
- B) Oscillates
- C) Moves up and down
- D) Stays in place

Correct Answer: A (Rotates in place)

Q16. The purpose of "COMPRESSED AIR" in a diesel engine is to _____

- A) Turns turbo Charger
- B) Starts Engine
- C) Gives Power
- D) Controls fuel Supply

Correct Answer: B (Starts Engine)

Q17. Generator engine on board ships is started using

- A) Compressed air
- B) Air compressor
- C) Hydraulic Oil Motors / Pressure
- D) Turbo generator

Correct Answer: A (Compressed air)

- A) False
- B) True

Correct Answer: A (False)

Q19. Cross head type engines doesn't have Piston Rod between Piston and Connecting Rod

- A) False
- B) True

Correct Answer: A (False)

Q20. Function of crankcase lubricating oil in a diesel engine is to reduce friction between moving parts, cooling the parts and to _____

- A) Prevent corrosion
- B) Supply power
- C) Turn the crankshaft
- D) Improve combustion

Correct Answer: A (Prevent corrosion)

Q21. The purpose of Turbocharger in a Diesel engine is to _____

- A) Reduces friction
- B) Increase air supply
- C) Gives power
- D) Turns turbo charger

Correct Answer: B (Increase air supply)

Q22. Turbo Alternator is a generator operating on steam produced from waste heat of Main engine exhaust gases

- A) False
- B) True

Correct Answer: B (True)

Q23. Why diesel engine generator does not have a reversing mechanism

- A) Running reverse its phase sequence will change
- B) Running reverse it produces DC instead of AC
- C) Running reverse it consumes power instead of producing power
- D) Running reverse does not produce power

Correct Answer: C (Running reverse it consumes power instead of producing power)

- A) Feed system
- B) Lubricating system
- C) Cooling system
- D) Fuel system

Correct Answer: A (Feed system)

Q25. Steam turbine driven generator is called

- A) Shaft generator
- B) Turbo alternator
- C) Generator
- D) Alternator

Correct Answer: B (Turbo alternator)

Q26. Main engine is part of _____ system

- A) feed water
- B) Electricity generation
- C) Bilge
- D) Propulsion

Correct Answer: D (Propulsion)

Practice Set 4

Q1. What Machine Tool will you be Using for Making Axial hole in a Round bar.

- A) Bending machine
- B) Grinding machine
- C) Drill machine
- D) Lathe machine

Correct Answer: D (Lathe machine)

Q2. What Machine Tool will you be Using for Cutting a joint.

- A) Lathe machine
- B) Bending machine
- C) Drill machine
- D) Scissors

Correct Answer: D (Scissors)

Q3. What machine will you use for cutting a large plate

- A) Welding Machine
- B) Drill Machine
- C) Gas Cutting Machine
- D) Grinding Machine

Correct Answer: C (Gas Cutting Machine)

- A) Drill machine
- B) Lathe machine
- C) Grinding machine
- D) Welding machine

Correct Answer: D (Welding machine)

Q5. What Machine Tool will you be Using for Making holes in a plate

- A) Grinding machine
- B) Drill machine
- C) Bending machine
- D) Lathe machine

Correct Answer: B (Drill machine)

Q6. To make a new flange for a pipe you will need:

- A) Chisel, hammer and drilling machine
- B) Lathe machine and drilling machine
- C) Grinding machine, drilling machine and pipe cutter
- D) Welding machine and milling machine

Correct Answer: B (Lathe machine and drilling machine)

Q7. Which of these is NOT a part of a lathe

- A) Anvil
- B) Head stock
- C) Tool post
- D) Chuck

Correct Answer: A (Anvil)

Q8. What Machine Tool will you be Using for Removing extra material after welding

- A) Drill machine
- B) Lathe machine
- C) Grinding machine
- D) Bending machine

Correct Answer: C (Grinding machine)

Q9. During lathe work, goggles protect our eyes from _____

- A) Fumes
- B) Heat
- C) Metal chips
- D) Flash Light

Correct Answer: C (Metal chips)

- A) slip
- B) fall
- C) sprain
- D) fracture

Correct Answer: C (sprain)

Q11. DO'S on Machine safety...Mark the incorrect one

- A) Keep machine clean and in good condition
- B) Check wheel rotation after running of machine
- C) Switch off machine immediately if anything goes wrong
- D) Check oil levels of machine before starting

Correct Answer: B (Check wheel rotation after running of machine)

Q12. DONT'S in the workshop...Mark the incorrect one

- A) Do not throw things or play practical jokes
- B) Do leave your machine unattended
- C) Do not run in the workshop
- D) Do not touch any equipment unless authorised to do so

Correct Answer: B (Do leave your machine unattended)

Q13. While working with machines do not wash your hands with coolant

- A) True
- B) False

Correct Answer: A (True)

Q14. What machine will you use for cutting a large plate?

- A) Welding Machine
- B) Drill Machine
- C) Gas Cutting Machine
- D) Grinding Machine

Correct Answer: C (Gas Cutting Machine)

Q15. What Machine Tool will you be Using for Joining two plates

- A) Drill machine
- B) Lathe machine
- C) Grinding machine
- D) Welding machine

Correct Answer: D (Welding machine)

- A) 50 degrees
- B) 70 degrees
- C) 30 degrees
- D) 90 degrees

Correct Answer: B (70 degrees)

Q17. Oxygen and _____ is used in gas welding on board

- A) Argon
- B) Acetylene
- C) Nitrogen
- D) LPG

Correct Answer: B (Acetylene)

Q18. What Machine Tool will you be Using for Removing extra material after welding.

- A) Drill machine
- B) Lathe machine
- C) Grinding machine
- D) Bending machine

Correct Answer: C (Grinding machine)

Q19. Before starting arc welding you must:

- A) Extend the welding cables
- B) Connect the electrode holder to the earth clamp
- C) Connect the welding cable to the earth clamp
- D) Connect the earth Clamp to the work piece

Correct Answer: D (Connect the earth Clamp to the work piece)

Q20. Gases used in gas welding are

- A) Acetylene and oxygen
- B) CO2 and LPG
- C) Oxygen and LPG
- D) Acetylene and LPG

Correct Answer: A (Acetylene and oxygen)

Q21. The welding arc length should be:

- A) Equal to the diameter of the electrode
- B) Less than the diameter of the electrode
- C) 20mm
- D) 6-12mm

Correct Answer: A (Equal to the diameter of the electrode)

- A) False
- B) True

Correct Answer: A (False)

Q23. Too long an arc will cause

- A) This is bulb up the weld pool
- B) Low penetration coarse splatter & flat bead
- C) Uncontrolled penetration slag globules electrode stuck to weld
- D) Even bead & good penetration & good welding

Correct Answer: B (Low penetration coarse splatter & flat bead)

Q24. Too short an arc length will cause an uneven bead due to arc failure

- A) None of the above
- B) Good welding
- C) Low penetration coarse splatter
- D) Flat bead

Correct Answer: A (None of the above)

Q25. Electrode should be kept at a distance of _____ above the spot where we wish to strike the arc

- A) 30-40 mm
- B) 20-30 mm
- C) 40-50 mm
- D) 35-45 mm

Correct Answer: B (20-30 mm)

Q26. Welding gloves made from tanned leather can be following combinations

- A) 3-finger and 5-finger type
- B) 2-finger and 4-finger type
- C) 4-finger and 6-finger type
- D) 1-finger and 2-finger type

Correct Answer: A (3-finger and 5-finger type)

Q27. Spats protect the ankles from melted metal and splatter

- A) True
- B) False

Correct Answer: A (True)

- A) False
- B) True

Correct Answer: A (False)

Practice Set 5

Q1. The level measuring device, Gauge glass & can be used for

- A) Tanks of large depth
- B) Multi Purpose
- C) Tanks of Small depths
- D) Oil can

Correct Answer: C (Tanks of Small depths)

Q2. The level measuring device, Level Indicator can be used for

- A) Oil level in generator crankcase
- B) Sumps of purifiers, compressors, etc
- C) Oil can
- D) Small to large tanks within the engine room

Correct Answer: B (Sumps of purifiers, compressors, etc)

Q3. The level measuring device, Sounding tape can be used for

- A) Oil can
- B) Tanks of large depth
- C) Multi Purpose
- D) Oil level in generator crankcase

Correct Answer: B (Tanks of large depth)

Q4. The level measuring device, Remote level indicators can be used for

- A) Multi Purpose
- B) Oil can
- C) Tanks of large depth
- D) Oil level in generator crankcase

Correct Answer: A (Multi Purpose)

Q5. A sounding tape is used for measuring level of a liquid in a:

- A) Tank
- B) Boiler
- C) Crank case
- D) Cylinder

Correct Answer: A (Tank)

- A) Fore Peak Ballast Tank
- B) FO Storage Double Bottom Tank
- C) After Peak Ballast Tank
- D) Lub Oil Storage Tank

Correct Answer: D (Lub Oil Storage Tank)

Q7. A dip stick is used for checking level of oil in a

- A) Filter
- B) Tank
- C) Cylinder
- D) Crank case

Correct Answer: D (Crank case)

Q8. The level measuring device, Dip stick can be used for

- A) Multi Purpose
- B) Oil level in generator crankcase
- C) Tanks of large depth
- D) Oil can

Correct Answer: B (Oil level in generator crankcase)

Q9. The level measuring device, Sounding rod can be used for

- A) Oil can
- B) Tanks of large depth
- C) Oil level in generator crankcase
- D) Multi Purpose

Correct Answer: D (Multi Purpose)

Q10. The most common item provided for checking oil level in a small machine is

- A) Sounding tape
- B) Sounding rod
- C) Sight glass
- D) Remote level indicator

Correct Answer: C (Sight glass)

Q11. What material is not a commonly used as insulation material?

- A) Plastic
- B) Wood
- C) Glass Wool
- D) Fire Bricks

Correct Answer: A (Plastic)

- A) Insulating material
- B) Cooling system
- C) Turbo charger
- D) Air circulation

Correct Answer: A (Insulating material)

Q13. What is the common name for item used for preventing the loss of heat from pipes or equipment?

- A) Lagging
- B) Cooling system
- C) Exhaust boiler
- D) Air circulation

Correct Answer: A (Lagging)

Q14. What materials are banned for use as insulation materials?

- A) Fire Bricks
- B) Thermocole
- C) Fiberglass Wool
- D) Asbestos

Correct Answer: D (Asbestos)

Q15. Woolen garments, blankets and quilts are termed as Insulating Materials

- A) True
- B) False

Correct Answer: A (True)

Q16. While working with Insulating material such as glass wool, you must not protect your body using gloves and goggles

- A) True
- B) False

Correct Answer: B (False)

Q17. Lagging is the Insulating material wrapped around pipes, boilers or tanks to allow loss of heat

- A) True
- B) False

Correct Answer: B (False)

Q18. Electrical Insulation prevent flow of

- A) Power
- B) Resistance
- C) Electricity
- D) Voltage

Correct Answer: C (Electricity)

- A) True
- B) False

Correct Answer: B (False)

Q20. Insulating material used is generally Fire resistant

- A) True
- B) False

Correct Answer: A (True)

Q21. Chemicals should be stored in _____

- A) in accommodation
- B) in engine room
- C) in separate well ventilated store
- D) on deck

Correct Answer: C (in separate well ventilated store)

Q22. If any chemical fall on the body, first action should be

- A) apply medicine to affected area
- B) wipe clean the affected area
- C) call for the doctor
- D) thoroughly wash affected area

Correct Answer: D (thoroughly wash affected area)

Q23. Chemicals on-board are not to be used for

- A) cleaning the boiler
- B) cleaning the cooking utensils
- C) boiler water treatment
- D) fuel oil treatment

Correct Answer: B (cleaning the cooking utensils)

Q24. Disposal of used/expired chemical container should be done by

- A) throwin into deep sea
- B) disposal with ships garbage
- C) disposal as per makers instruction
- D) burning in incinerator

Correct Answer: C (disposal as per makers instruction)

- A) Fuel treatment
- B) Boilers
- C) Testing quality of water
- D) All of the above

Correct Answer: D (All of the above)

Q26. Use of personal protective gear while handling chemicals...Mark the incorrect one

- A) Face mask
- B) Apron
- C) Rubber gloves
- D) Sun protect Goggles

Correct Answer: D (Sun protect Goggles)

Q27. Steering gear is used to turn the

- A) crane boom/jib
- B) main engine
- C) propeller
- D) rudder

Correct Answer: D (rudder)

Q28. Steering gear is located in the

- A) forward of engine room
- B) on the bridge
- C) in a separate compartment aft of engine room
- D) forecastle

Correct Answer: C (in a separate compartment aft of engine room)

Q29. Rudder of the ship is turned by means of a

- A) hydraulic pump
- B) propeller
- C) Cylinder and Ram arrangement only
- D) steering wheel

Correct Answer: C (Cylinder and Ram arrangement only)

Q30. Which of the following is a correct statement

- A) Steering gear is located at aft part of the ship
- B) Rudder is connected to the propeller
- C) Rudder is located in the steering flat
- D) Propeller is turned by the rudder

Correct Answer: A (Steering gear is located at aft part of the ship)

- A) Hydrophore Unit
- B) Actuating Unit
- C) Power Unit
- D) Control Unit

Correct Answer: A (Hydrophore Unit)

Q32. The thruster placed in the aft of the ship is called Bow Thruster

- A) False
- B) True

Correct Answer: A (False)

Q33. The thruster placed in the forward end of the ship is called Stern Thruster

- A) True
- B) False

Correct Answer: B (False)

Q34. While taking rounds in the Steering flat, following to be checked...Mark the incorrect

- A) Leakages from pumps, pipe joints, etc
- B) Load of the pump in Ampere
- C) Oil level of MDO in the steering gear system
- D) Abnormal noise or vibrations

Correct Answer: C (Oil level of MDO in the steering gear system)

Practice Set 6

Q1. A quick closing valve is fitted on

- A) boiler steam line
- B) main engine cooling system
- C) fuel tanks above double bottom tanks
- D) compressed air line

Correct Answer: C (fuel tanks above double bottom tanks)

Q2. Man hole door on a tank is fitted for

- A) allowing entry to the tank when needed
- B) preventing entry by unauthorized persons
- C) preventing damage on tanks
- D) strengthening the tank

Correct Answer: A (allowing entry to the tank when needed)

- A) prevents fire from occurring
- B) can be remotely closed in an emergency
- C) prevents oil spills in engine room
- D) stops air supply to main engine

Correct Answer: B (can be remotely closed in an emergency)

Q4. Air vent to tanks is provided for

- A) preventing build up of pressure or vacuum
- B) allowing liquid to come out when tank is full
- C) preventing fire
- D) for ventilation

Correct Answer: A (preventing build up of pressure or vacuum)

Q5. Sounding pipes on tanks are fitted for finding

- A) level of liquid in the tank
- B) pressure in the tank
- C) temperature in the tank
- D) abnormal sound in the tank

Correct Answer: A (level of liquid in the tank)

Q6. Quick closing valve operation is carried out from

- A) remote location outside engine room
- B) anywhere in the engine room
- C) steering flat
- D) navigation bridge

Correct Answer: A (remote location outside engine room)

Q7. Ballast tank on a ship are filled up with _____

- A) drinking water
- B) sea water
- C) cargo oil
- D) water from other tanks

Correct Answer: B (sea water)

Q8. Settling tanks on ship are provided for

- A) allowing water and sludge to separate before oil separator
- B) mixing oils before use
- C) storing oils before its use
- D) filtering water from fuel oil

Correct Answer: A (allowing water and sludge to separate before oil separator)

- A) Oil sample is being taken
- B) Temperature of oil being supplied
- C) Oil sounding in the tank being filled
- D) Oil sounding in bunker barge

Correct Answer: C (Oil sounding in the tank being filled)

Q10. Quick Closing Valves can be operated...

- A) All of the above
- B) Locally
- C) Pneumatically
- D) Remotely

Correct Answer: A (All of the above)

Q11. Each tank is required to have at least the following

- A) All of the above
- B) Outlet Line
- C) Air Vent
- D) Sounding Pipe

Correct Answer: A (All of the above)

Q12. Storage Tank in the engine room will be called as _____ if the tank capacity is in between 2-50 tonnes

- A) Ballast Tank
- B) Medium Tank
- C) Large Tank
- D) Small Tank

Correct Answer: D (Small Tank)

Q13. On finding an injured person in the engine room, your first action will be to

- A) apply first aid
- B) report to the duty officer on watch
- C) bring a stretcher
- D) look for the cause of injury

Correct Answer: B (report to the duty officer on watch)

Q14. A fire alarm in the engineroom is activated

- A) from the bridge
- B) automatically on machinery failure
- C) due to a black out
- D) due to fire in the engine room

Correct Answer: D (due to fire in the engine room)

- A) report to the duty officer on watch
- B) use large fire extinguisher on the fire
- C) use emergency exit to get out
- D) raise fire alarm

Correct Answer: C (use emergency exit to get out)

Q16. A machinery failure alarm in the engine room is activated

- A) from the bridge
- B) automatically on machinery failure
- C) due to collision of the ship
- D) due to fire in the engine room

Correct Answer: B (automatically on machinery failure)

Q17. A general alarm is activated

- A) from the bridge
- B) automatically on machinery failure
- C) due to black out
- D) due to high bilge level

Correct Answer: A (from the bridge)

Q18. UMS stands for

- A) Uniform Machinery Space Operation
- B) Unattended Machinery Space Operation
- C) Undermanned Machinery Space Operation
- D) Under Machinery Space Operation

Correct Answer: B (Unattended Machinery Space Operation)

Q19. Accident can't happen in the engine room due to falling objects

- A) False
- B) True

Correct Answer: A (False)

Q20. Which of the following is NOT an audio visual alarm

- A) Fire Alarm
- B) Co2 Alarm
- C) Ship security alarm
- D) Machinery Alarm

Correct Answer: C (Ship security alarm)

- A) True
- B) False

Correct Answer: B (False)

Practice Set 7

Q1. Emergencies that can occur in the Engine room

- A) Stoppage of Main engine
- B) Crank case explosion
- C) Flooding of the engine room
- D) All of the above

Correct Answer: D (All of the above)

Q2. Fixed fire fighting system for engine room

- A) DCP
- B) CO2
- C) inert gas
- D) nitrogen

Correct Answer: B (CO2)

Q3. Not a part of a fire triangle

- A) fuel
- B) heat
- C) electricity
- D) air

Correct Answer: C (electricity)

Q4. Main fire pump is located

- A) on main deck
- B) at the fire station
- C) in the engine room
- D) in the steering flat

Correct Answer: C (in the engine room)

Q5. To fight an electric fire you would use

- A) dry powder
- B) steam jet
- C) water spray
- D) special foam

Correct Answer: A (dry powder)

- A) CO2 cartridge
- B) air cartridge
- C) chemical cartridge
- D) nitrogen cartridge

Correct Answer: A (CO2 cartridge)

Q7. High expansion foam system is suitable for fighting fires in

- A) accommodation
- B) cargo holds
- C) engine room
- D) deck of ship

Correct Answer: C (engine room)

Q8. Which of the following provided for connecting to shore water supply

- A) foam tank
- B) fixed foam system
- C) fire hydrant
- D) international shore connection

Correct Answer: D (international shore connection)

Q9. The emergency fire pump on a ship is located

- A) at the poop deck
- B) inside the engine room
- C) outside the engine room
- D) at the boat deck

Correct Answer: C (outside the engine room)

Q10. Your first action upon finding a fire

- A) use portable extinguisher
- B) use portable extinguisher
- C) raise an alarm
- D) switch off electrical power supply

Correct Answer: C (raise an alarm)

Q11. Fire hose on ship are made of

- A) strong canvas
- B) thick cloth
- C) leather
- D) flexible teel

Correct Answer: A (strong canvas)

- A) portable fire extinguisher
- B) 45 liters foam fire extinguisher
- C) fixed CO2 fire extinguishing system
- D) fire pumps and hoses

Correct Answer: C (fixed CO2 fire extinguishing system)

Q13. Which one of the following will be used first on a small fire in the engine room

- A) portable fire extinguisher
- B) fire blanket
- C) fixed fire extinguishing system
- D) fire pumps and hoses

Correct Answer: A (portable fire extinguisher)

Q14. Full form of PASS....Mark the correct one

- A) Pull, Aim, Smoke,
- B) Pull, Aim, Squeeze, Sweep
- C) Pull, Aim, Sponge, Sweep
- D) Push, Automatic, Sweep, Squeeze

Correct Answer: B (Pull, Aim, Squeeze, Sweep)

Q15. Following is not a part of Fire detection system

- A) Heat Detector
- B) Flame Detector
- C) Body Detector
- D) Smoke Detector

Correct Answer: C (Body Detector)

Q16. Which Instrument is used for testing Insulation

- A) Driver
- B) Megger
- C) Drager
- D) Jagger

Correct Answer: B (Megger)

Q17. Before starting maintenance on any equipment, following precautions to be taken...Mark the incorrect one

- A) Remove the safety guards
- B) Put a warning notice on the Mains switch
- C) Switch on the main supply
- D) Switch off the machine

Correct Answer: C (Switch on the main supply)

Q18. Before re-starting a machine, following precautions to be taken...Mark the incorrect one

marine Engineering Knowledge (MCK) Exit Exam Prep

brightmariner.com

- A) Check that no tools have been left on or near the machine
- B) Replace the safety guard after starting the machine
- C) Restore the power supply
- D) Remove any warning notices

Correct Answer: B (Replace the safety guard after starting the machine)

Q19. Dry full contact body resistance is about _____ ohms at 250V

- A) 4000
- B) 5000
- C) 2000
- D) 3000

Correct Answer: C (2000)

Q20. What is the minimum value of shock current (AC) which can be fatal

- A) 25 mA
- B) 35 mA
- C) 20 mA
- D) 15mA

Correct Answer: D (15mA)
